

Sudeep Nandyal

Bengaluru, Karnataka, India

+91-8073654422 — sudeepsnandyal@gmail.com —  LinkedIn —  Portfolio

Professional Summary

Entry-level **Java Full Stack Developer / Software Engineer** with hands-on experience in Core Java, SQL, Spring Boot, and RESTful web services. Skilled in building scalable backend systems and responsive web applications using HTML, CSS, and JavaScript. Passionate about writing clean, maintainable code and contributing to real-world software development projects.

Education

Bachelor of Engineering in Computer Science	2025
Poojya Doddappa Appa College of Engineering, Kalaburagi — VTU	
Pre-University (PUC)	2021
Shree Guru Independent PU College of Science — Karnataka	
SSLC	2019
Sri Sathya Sai Saraswati Vidyaniketanam Boys High School — Karnataka	

Technical Skills

Programming	Java, Python, SQL, PL/SQL
Core Concepts	OOP, Collections, Exception Handling, Multithreading
Web Technologies	HTML, CSS, JavaScript
Frameworks	Spring Boot, Hibernate, Servlets, JDBC,
API Development	RESTful Web Services, JSON, Postman, API Design Principles
Database	Oracle SQL, MySQL, Query Optimization, ACID Properties
Tools	Eclipse, VS Code, Git, Maven, IntelliJ IDEA,
Soft Skills	Problem Solving, Analytical Thinking, Collaboration, Communication, Adaptability

Internship (Java Full Stack)

Software Trainee – Java Full Stack Developer	Jun 2025 – Dec 2025
JSpiders, Rajajinagar — Bengaluru, India	

- Developed full stack web applications using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Designed and implemented RESTful APIs and performed CRUD operations using SQL and JPA.
- Wrote optimized SQL queries involving joins and indexing to improve database performance.
- Identified and fixed bugs through debugging and log analysis to improve application stability.
- Used Git and GitHub for version control, code collaboration, and maintaining project repositories.
- Participated in team discussions, code reviews, and followed Agile development practices.

Projects

AI-Driven Health Appointment & Prescription Management System

- Designed and developed a Spring Boot-based backend system to manage patient registration, doctor scheduling, and prescription records.
- Followed layered architecture with REST controllers, service layer business logic, and repository layer for database interaction.
- Implemented secure REST APIs and performed CRUD operations using MySQL and JPA.
- Tested APIs using Postman and verified proper status codes and JSON responses.

Age and Gender Detection Using Python

- Developed a real-time age and gender detection system using Python, OpenCV, and pre-trained CNN models.
- Implemented face detection and image preprocessing before prediction.
- Improved processing speed by resizing frames and reducing redundant computations.
- Achieved high prediction accuracy on live webcam input through model optimization.

Certifications

- Java – HackerRank
- SQL – HackerRank
- Introduction to IoT – NPTEL
- Software Engineering Virtual Experience – JPMorgan Chase (Forage)
